

ABSTRACT OF THE DISCLOSURE

5

The present invention is directed to new pharmaceutically active compounds of Formula I:

10

15

in which

the dashed line denotes an optional double bond;

n is 1, 2 or 3;

20

p is 0, 1, 2 or 3;

q is 0, 1 or 2;

25

each R<sup>1</sup> is independently selected from halogen, hydroxy, lower alkoxy (optionally substituted with phenyl), lower alkyl, nitro, amino, amino carbonyl, (lower alkyl)amino, di(lower alkyl)amino, and (lower alkanoyl)amino;

each R<sup>2</sup> is lower alkyl; and

R<sup>3</sup> is selected from

30

35

acyloxy; or a pharmaceutically acceptable salt  
thereof or  
5            *N*-oxide derivative thereof, or an individual isomer or  
mixture of isomers thereof, as well as  
compositions containing them and their methods  
of use and production.
